

- Understand Divya's code+data
 - ChatGPT API
 - Recommend: start with Gemini
 - Web scraping: BeautifulSoup library
 - Recommend: CheerIO library
 - Collecting sample recipes from websites
 - Recommend: allrecipes.com (different cuisines)
 - USDA FoodCentral API (ingredients, calories, etc.)
 - How to quantitatively compare text data (e.g., one recipe with another)
 - Divya: cosine similarity (pandas)
 - Recommend: research other methods for text comparison
 - Web application
 - Recommend: do NOT read about this at this time
- Check with different cuisines (ethnic cuisines, vegetarian, children)
- Check the accuracy of other nutrients
 - Divya checked calories
 - Also test sodium, cholesterol, carbohydrates, ...
